As a Dietary Guidelines National Strategic Partner, we want school leaders to know that the USDA will be announcing several grant opportunities very soon (we'll keep you posted!). These grants will focus on school infrastructure, Farm to School grants and more as part of the new Harvest to Hallways initiative. Enjoy the short clip below which includes a fun song from The OrganWise Guys!

While schools prepare for these upgrades, you can help students understand why the new Dietary Guidelines matter and why real food tastes better! Our OrganWise Guys resources support the 2025–2030 "Eat Real Food" message and are available now. See the complete package here.

Questions? Schedule a 15-minute call here. Thank you for all you do for your students. We look forward to helping them thrive.
